THE NATIONAL SEED TRACKING AND TRACING SYSTEM NIGER

COMMISSIONER USER MANUAL

About this guide

The Seed Tracking and Tracing System (STTS) involves proper registration of; the seed source (Research, seed companies and cooperatives), seed lots at each seed producers (packages), and seed packs with the use of unique seed field/lot identifiers. The Tracking component is particularly aimed at; identification, preservation and quality assurance; while tracing is aimed at solving problems faced by the product non-conformance to standards at any point along the seed production and supply value chain.

This guide shows the step by step ways to use/navigate the STTS general system
